Academic Affairs at Springer Nature

Date	October 13th
Time	10:30–12:00
Venue	Face-to-face, will be announced later
Language	English

Designed by macrovector / Freepik

Have you ever thought about the academic publishing industry as your career?

Many people associate "scholarly publishing" with journals and books. So what kinds of jobs are available at publishing companies, and what kind of people work there?

In this event, Dr. Urakami from Springer Nature will introduce himself including his career path and give an overview of the academic publishing industry and the latest trends.

This is an excellent opportunity to ask about career paths into the academic publishing industry and writing papers.

There will be a longer Q&A period, so please feel free to ask any questions.
