

For successful presentations at academic conferences

~Springer Nature Workshop

This course helps students develop practical skills for delivering their own research presentations clearly and effectively in English, including presentation structure, effective slide and poster design, and communication techniques. Participants will systematically learn how to create a clear and engaging story for their audience, use visual elements effectively, and improve their delivery skills, including how to handle Q&A sessions. Students who wish to enhance the impact of their academic presentations and research talks in English are highly encouraged to participate. The first half of the course consists of lectures by the instructor, followed by small-group activities in the second half.
