GTR Fundamental Course II, 2pt

「Facilitation workshop」

Lecturer: **Eri Kabira (Meiji University)**

Date	September 30, 2022 (Tuesday)
Time	13:00-16:00
Venue	Zoom
Language	English

This is a workshop to learn facilitation in a practical way through group work. Participants will learn about facilitation and psychological safety theory, and practice what they have learned through group work.

Designed by vectorjuice / Freepik

Facilitation is a technique for encouraging active discussion during meetings, conferences, and other group work. In GTR, there are opportunities for group work, including interdisciplinary research contests, and we believe this is a skill that will be useful not only in student life, but also in the future, whether you go to work in a company or in academia. The lecturer Kabira is active and cheerful person. So she will join actively to group work to encourage you to understand the concept. Although this lecture will be online, but it is a training program in which you can actively participate. We look forward to your participation!
