

GTR Seminar:

# Why publish? ... and how to worry less when we do!

## Christopher Surridge, PhD

**Chief Editor, Nature Plants**

When scientific journals were established two centuries ago their main function was to deliver the results of scientists' thoughts and experiments to their fellow scientists. Today, the internet has made global communication so easy that this traditional role of journals is no longer needed. Dr Chris Surridge, Chief Editor of Nature Plants will discuss what roles journals still play in the scientific endeavour and suggest ways to engage with the process most effectively and with as little pain as possible.

**Date : August 29 (Fri), 2025**

**11:00 ~ 12:00**

**Place : ITbM 1<sup>st</sup> floor Lecture Room**
